# SmartVizX

- India's premier VR technology firm
- Focused on Architecture-Engineering-Design
- Started in Feb 2015
- About 50 people, development offices in Noida & Bangalore
- 56 satisfied clients, 3 patents, multiple awards

# Why VR?

- The best way to do anything that deals with space
- The “Next Computing Platform” of the future
- Challenging, innovating, interesting

# State of current VR ecosystem

# State of current VR ecosystem

- Like the computers in the 80's
- Make spreadsheets and store recipes!
- Clunky, low-performing, expensive

Present-day  
VR headsets

Legally blind

Unfit to drive

"Perfect" vision

VR is this impactful at the current state - imagine the future.

# What makes VR work?

Optics	Sensor fusion	User study
Displays	Rendering	Presence (self, tele, social)
Computational Optics	Animation	Mechanical engineering
Control systems	Haptics	Electrical engineering
Audio spatialization & propagation	Input, interactions & interfaces	Optomechanical engineering
Sensing and reconstruction	Material science	Machining
Sensor technology	Perceptual psychology	Programming

Designing for VR

Designing in VR

# Designing for VR

- Easy to jump in, tough to master
- Basics are ridiculously crucial
- Learn the rules
- So you can break them
- There are no set rules yet

# Designing in VR

# Designing in a conventional 3D application

# Designing in VR is

- Intuitive
- Collaborative
- Personal
- Fun
- Undefined
- Unexplored
- People don't want to give up existing tools
